

## Google Flow Codes for Video Generation 🎥 ✨

Google Flow Link 🖱️ : <https://labs.google/fx/tools/flow>

### CAMERA ZOOM & FOCUS

1. **/zoom** - Adjusts lens magnification smoothly toward or away from the subject without moving the camera physically
  2. **/zoomout** - Pulls the camera lens back to show a wider field of view, revealing more of the scene
  3. **/zoomin** - Magnifies the lens closer on a subject to create dramatic focus and emphasize details
- 

### DOLLY MOVEMENTS (Camera Position Changes)

4. **/dolly** - Moves the camera forward or backward along a straight path toward/away from the subject
  5. **/dollyin** - Moves the camera closer to the subject, creating depth and intimacy
  6. **/dollyout** - Moves the camera away from the subject, revealing the full scene and context
- 

### ORBITAL & ROTATIONAL MOVEMENTS

7. **/orbit** - Rotates the camera circularly around a central subject or point
  8. **/orbit360** - Complete 360-degree rotation around the subject for full perspective view
  9. **/pan** - Horizontal camera sweep left or right across the scene
  10. **/tilt** - Vertical camera movement up or down while staying in place
  11. **/truck** - Lateral side-to-side camera movement parallel to the subject
  12. **/pedestal** - Vertical up-and-down camera movement (like an elevator)
- 

### ADVANCED CAMERA MOVEMENTS

13. **/crane** - Elevated camera arc movement, typically rising or descending in a sweeping motion
14. **/drone** - Aerial camera movement using drone perspective

- 15. **/dronefly** - Drone camera flying forward through space
  - 16. **/droneorbit** - Drone circling around a subject from above
  - 17. **/aerial** - High-altitude wide perspective shot showing landscape/scene from above
  - 18. **/fpv** - First-person view camera movement (immersive, from viewer's perspective)
  - 19. **/fpvdrone** - First-person view from a flying drone perspective
- 

## **TRACKING & FOLLOWING**

- 20. **/tracking** - Camera follows alongside a moving subject while maintaining distance
  - 21. **/follow** - Camera stays locked on and follows a subject's movement through the scene
  - 22. **/handheld** - Unstable, slightly shaky camera movement mimicking hand-held filmmaking
  - 23. **/steadicam** - Smooth, gliding camera movement with professional stabilization
- 

## **TEMPORAL EFFECTS (Time Manipulation)**

- 24. **/slowmo** - Slow-motion playback for dramatic or detailed moments
  - 25. **/timelapse** - Accelerated playback compressing time (clouds moving, sunset, growth)
  - 26. **/hyperlapse** - Time-lapse with camera movement combined (moving + time compression)
  - 27. **/speedramp** - Variable speed changes within a shot (fast to slow or vice versa)
- 

## **MOTION & VISUAL EFFECTS**

- 28. **/motionblur** - Blur streaks added to moving objects for sense of speed
- 29. **/shakycam** - Deliberate camera shake and vibration for intensity or handheld feel
- 30. **/glitch** - Digital distortion/glitch effects for modern, edgy aesthetic

---

## PERSPECTIVE & FRAMING

- 31. **/pov** - Point-of-view camera showing the subject's perspective
- 32. **/firstperson** - First-person perspective (viewer's eyes/view)
- 33. **/thirdperson** - Third-person external perspective watching the subject
- 34. **/closeup** - Tight framing focusing on small details or facial expressions
- 35. **/wide** - Wide, expansive framing showing the full scene and environment
- 36. **/macro** - Extreme close-up showing tiny details with magnified perspective

---

## FOCUS TECHNIQUES

- 37. **/rackfocus** - Shifts focus from one plane to another (foreground to background or vice versa)
- 38. **/focuspull** - Gradual, smooth transition of focus from one subject to another

---

## TRANSITION & DYNAMIC EFFECTS

- 39. **/whip** - Fast camera movement that transitions the scene (motion blur between shots)
- 40. **/whippan** - Rapid horizontal pan that acts as a transition between scenes
- 41. **/spin** - Camera or scene spinning rotation effect
- 42. **/rotation** - Rotating movement around an axis (360° spin variations)
- 43. **/bullettime** - Slow-motion effect with active camera movement (The Matrix-style)
- 44. **/freeze** - Pauses motion at a key moment while camera may still move
- 45. **/loop** - Repeating, continuous cycle of motion or action
- 46. **/reverse** - Plays footage backwards for surreal or creative effect

---

## CREATIVE TRANSFORMATIONS

- 47. **/morph** - Smooth transformation/shape-shifting between subjects or scenes
- 48. **/transition** - Scene change effect connecting two shots smoothly

49. **/cinematic** - Professional film-quality look with color grading and camera movement

50. **/epicshot** - Grand, impressive camera movement for dramatic, impactful moments
